Analysis of Feedback from students

Students' feedback on Curriculum, Teaching, Learning and Evaluation has been collected from 2019-21 and 2020-22 batch students. To collect the Feedback from students, a structured questionnaire was given to them. The data collected, analysed and observations were drawn as below.

The feedback analysis clearly indicates that more than 90% of students are very much satisfied with the learning environment, applicability/ relevance of the course, depth of the course content, pedagogical strategies adopted, relevance of specialization, Availability of text/ reading/ reference materials in the library, project guidance and support, existing student evaluation system, overall learning experience offered by the Institution. From the analysis it is evident that students expect more curricular/cocurricular and extracurricular activities. There is a suggestion / request for update in curriculum and syllabi of the courses.
